

Helee Ramani

BACKEND DEVELOPER

I build the quiet stuff nobody sees but everyone needs.

📍 Surat, India | 📞 +91 90991 56354 | ✉️ heleeramani@gmail.com

👤 SUMMARY

Backend Developer with 1.5+ years of experience building secure and scalable web applications. Skilled in Node.js, Express.js, MongoDB, and REST API development, with strong hands-on work in CRUD operations, JWT authentication, role-based access control, and third-party API integration. Also experienced with Strapi CMS, PostgreSQL, and Python REST APIs. I enjoy writing clean, simple code that solves real business problems.

🔗 SKILLS

Backend — Node.js, Express.js, REST & CRUD APIs, JWT Authentication, Middleware, Role-Based Access, Payment Gateway Integration, Strapi CMS, Payload CMS, Python REST APIs (FastAPI & Flask), Docker, Redis, Socket.IO

Frontend — JavaScript, React.js, Next.js (basic)

Database — MongoDB, PostgreSQL, Supabase

Tools & Workflow — Git, GitHub, Postman, VS Code, NPM, Yarn, Render, Vercel, Netlify, Expo Go, REST API testing

📁 EXPERIENCE

Backend Developer — Geek Web Solution

Jan 2025 – Present

- Built the backend of a large casino platform, including secure authentication (JWT, 2FA), multi-role access control, casino and sports betting modules, payment gateway integration, and casino provider integrations.
- Created a central back office to manage multiple casino brands from one system, with bonus, referral, commission, and reporting features built on scalable REST APIs.
- Developed Python REST APIs using Flask and FastAPI.
- Built demo backend management systems using Node.js, Express, MongoDB, PostgreSQL, and JWT authentication.

📁 PROJECTS

H79 — Casino Website

- Built a full casino platform with secure login and authorization, multi-role access control, an admin panel, deposit and withdrawal management, payment gateway and provider integrations, and bonus, referral, and commission systems — all backed by scalable REST APIs.
- Added a Telegram notification system to track real-time player activity such as sign-up, login, bets, wins, losses, deposits, and withdrawals.

Node.js, Strapi CMS

Casino Stars — Player panel & Admin panel

- Built a scalable platform with 6 role-based panels (Super Admin, Admin, Shop Manager, Shop Cashier, Operator, and Player) using a clean architecture and role-based access control.
- Added automatic video and screenshot capture for game start, end, win, and loss events, with database storage and multi-language support.

[Node.js](#), [Strapi CMS](#)

Casino Admin Panel — Casino Dashboard

- Built a secure back-office system where only admins and agents can log in to manage the platform.
- Built REST APIs for transactions, game and provider management, player and agent administration, account creation, CRUD operations, and bonus, referral, and commission rules, plus monthly and yearly reporting dashboards.
- Integrated REST APIs into Next.js applications.

[Node.js](#), [Express](#), [MongoDB](#), [Next.js](#)

Library Management System

- Final-year college project — a full-stack library app with separate Admin and User panels.
- Built full CRUD for books, students, and librarians, plus borrow and return workflows, payment integration, and secure REST APIs for smooth frontend-backend communication.

[Node.js](#), [Express](#), [React.js](#)

🎓 EDUCATION

Bachelor of Computer Applications

2022 – 2025

Sutex Bank College of Computer Applications

★ STRENGTHS

- Strong problem-solving and backend skills with 1.5+ years of hands-on MERN stack experience.
- Skilled at building scalable REST APIs, JWT authentication, role-based access, CRUD operations, payment gateway integration, Docker, Socket.IO, and database design.
- Good communicator. Work well with clients and teams, turning business needs into reliable solutions.
- Enjoy writing clean, simple code and always learning new backend tools and best practices.

✨ ADDITIONAL

Productivity — Notion, ClickUp, Linux (Ubuntu)

Languages — English, Hindi, Gujarati
